CERTIFICATE

This is to certify that Mr. PINNAM SAITEJA (Ht: No: 214821672017) studying MBA (HR), student of REAH SCHOOL OF BUSINESS MANAGEMENT. Successfully completed the project work on "A STUDY ON E-RECRUITMENT PROCESS WITH REFERENCE TO AEGIS BPO" Under the guidance of K.SWAROOP in our organization for the duration of 45 days.

He has been enthusiastic diligent and consistent in the study undertaken and has shown genuine interest and active involvement in the project.

For: AEGIS PVT LTD.

K.SWAROOP
Asst Hr manager.

DECLARATION

I hereby declare that this project report titled **"E- RECRUITMENT PROCESS at AEGIS BPO-HYDERABAD"** submitted by me to the department of Business management, **OSMANIA UNIVERSITY, Hyderabad**, is a confide work undertaken by me and it is not submitted to any other University or Institution for the award of any degree Diploma / certificate or published any time before.

Signature of the Student

PINNAM SAITEJA

CERTIFICATION

This is to certify that this project report titled **“E- RECRUITMENT PROCESS at AEGIS BPO-HYDERABAD”** submitted in partial fulfillment for the award of MBA Programme of Department of Business management, **OSMANIA UNIVERSITY**, Hyderabad, was carried out by **PINNAM SAITEJA** under my guidance. This is not been submitted to any other University or Institution for the award of any degree/ Diploma / certificate.

INTERNAL GUIDE

EXTERNAL GUIDE

ACKNOWLEDGEMENTS

I take this opportunity to extend my profound thanks and deep sense Gratitude to the authorities of “**AEGIS BPO - HYDERABAD**” for giving me the opportunity to undertake this project work in their esteemed organization.

I am very thankful to **Mr.K.SWAROOP**, Asst. Manager him valuable guidance at every stage of work that made the project work a successful one.

I especially express my sincere thanks to our respected principal **Assoc. Prof.D.SANDYA RANI** for providing the required facilities for the completion of the project.

I express my deep sense of gratitude to **Assoc. Prof. D.SANDYA RANI** Head of the Department, M.B.A, also my Internal Guide **Asst.Prof.N.LAXMA REDDY**, and also to the faculty member of **MBA** department for extending their kind cooperation and help in completing the project report.

I will fail in my duty if I forget to thank and owe a deep sense of gratitude to my parents and friends for their moral support.

I would also like to express my gratitude towards all those who have directly or indirectly contributed in accomplishing the project.

PINNAM SAITEJA

ABSTRACT

Now a day the standard recruitment technique has been revolutionized by the wave of internet. E-recruitment is the latest trend and it has been adopted by large and small-sized organizations. Significance of internet can be seen as checking out best appropriate job is simply a click away. Job portals, company websites and social networking all makes recruitment speedy and helps in finding best match for vacant positions. E-recruitment is getting trendy among recruiters and job seekers because of its benefits like time, cost, quality, etc. By simply a click of the mouse or tapping on the screen of his mobile or tablet, one will find the jobs as per his skills, education and professional experience. The main objective of this study is to find out the trends of on-line recruitment.

CHAPTERIZATION

The entire Project is 5 chapters..

CHAPTER-I: Introduction brings out the importance of the study, and states its objectives and hypotheses.

It also includes methodology and limitations.

CHAPTER II: REVIEW OF LITERATURE. will contain previous reviews, history of the Problems. A Quick Look on subjective well-being will also be carried out in chapter II.

CHAPTER III : INDUSTRY PROFILE AND COMPANY PROFILE.

CHAPTER-IV: DATA ANALYSIS AND INTERPRETATIONS.

CHAPTER-V: Findings, Suggestions and Conclusion

CHAPTER-I

INTRODUCTION

INTRODUCTION

The E-Recruitment System is an online system that will help out the organization to select the right person for the job. Recruitment problems will solve with the help of data mining techniques. Using electronic resources, typically the internet but also HR software, to guide or assist the hiring process in order to reduce the administrative and financial burden of recruitment and gain access to a wider pool of talent. Much of e-recruitment centers around major job sites which categorize open positions by location, industry and seniority. Businesses, or recruitment companies working on behalf of businesses, advertise open positions on these sites and provide instructions for applicants to follow. The initial sift of applications will either be performed by the recruitment firm or the business. Social media is increasingly being used in e-recruitment as a way to quickly reach out to potential candidates. The targeted nature of social media makes it useful for headhunting.

Companies may build their e-recruitment platforms in-house, use e-recruitment HR software or employ recruitment agencies that utilize e-recruitment as part of their package. E-recruitment may not be as suitable for senior positions where the pool of prospective candidates is much lower.

The E-Recruitment, also called as Online Recruitment, is the process of hiring the potential candidates for the vacant job positions, using the electronic resources, particularly the internet.

E-recruitment refers to the use of web-based technology for the various processes of attracting, assessing, selecting, recruiting and on boarding job candidates.

Internet job boards are rapidly gaining market share of all advertised jobs. According to HRAdvice.com, the biggest concerns when recruiting on the Internet include not enough time to review resumes, too many resumes, too many unqualified applicants due to the ease of application process, and potential exposure to discrimination charges due to adverse impact.

Faced with the expected wave of retiring baby boom employees, organizations are looking to entice retirees and seniors back into their organizations as employees or as consultants. Several new websites have emerged to address these organizational needs. The websites are: yourencore.com, seniors4hire.org, enрге.us and seniorjobbank.com.

According to TopJobSites.com, the top three general job websites by traffic ranking are Monster.com, CareerBuilder.com and HotJobs.com. TopJobSites.com reviews and ranks job and career websites based on a three months window of traffic volume. In addition to general job sites, the site compiles rankings for college sites, executive sites, niche sites, diversity sites, and international sites.

According to online recruiting commentator Peter Weddle, nearly two-thirds of all companies under-utilize their corporate web sites for recruiting. Weddle suggests the following recruiting website improvements: take full advantage of virtually unlimited web space, communicate your company's image as an employer, attract both active and passive job seekers, and provide a high-quality web experience.

Nowadays, companies make use of the internet to reach a large number of job seekers and hire the best talent for the company at a less cost, as compared to the physical recruitment process.

E-Recruitment includes the entire process of finding the prospective candidates, assessing, interviewing and hiring them, as per the job requirement. Through this, the recruitment is done more effectively and efficiently. Generally, the job vacancies are advertised on the world wide web (www), where the applicants attach their CV or resume, to get recognized by the potential recruiters or the employers.

The companies undertake their online promotional activities via their official websites, wherein the complete information about the corporation is enclosed. Through this information, the prospective candidate could decide whether to be a part of a firm or not. Thus, the firm's official website is considered to be an essential element of E-Recruitment.

E-recruitment elements-

1. Applicant tracking: candidate status with respect to the jobs applied by him/her
2. Employer's website: provides details of job opportunities and collect data for the same
3. Job boards: carry job advertisements from employers and agencies
4. Online testing: some kind of evaluation of candidates over Internet
5. Social media: quick reach out to potential candidates.

The two kinds of e-recruitment that an organization can use is-

1. Job Portals:

Posting the position with the job description and the job specification on the job portal and also searching for the suitable resumes posted on the site corresponding to the opening in the organization. Creating a complete online recruitment/application section in the company's own website. Companies have added an application system to its website, where the 'passive' job seekers can submit their resumes into the database of the organization for consideration in future, as and when the roles become available.

2. Resume Scanners:

Resume scanner is one major benefit provided by the job portals to the organizations. It enables the employees to screen and filter the resumes through pre-defined criteria's and requirements (skills, qualifications, experience, payroll etc.) of the job. Job sites provide a 24 x 7 access to the database of the resumes to the employees facilitating the just-in-time hiring by the organizations. Also, the jobs can be posted on the site almost immediately and is also cheaper than advertising in the employment newspapers.

Sometimes companies can get valuable references through the “passers-by” applicants. Online recruitment helps the organizations to automate the recruitment process, save their time and costs on recruitments.

Online Recruitment Techniques:

- Giving a detailed job description and job specifications in the job postings to attract candidates with the right skill sets and qualifications at the first stage.
- E-recruitment should be incorporated into the overall recruitment strategy of the organization.
- A well-defined and structured applicant tracking system should be integrated and the system should have a back-end support.
- Along with the back-office support a comprehensive website to receive and process job applications (through direct or online advertising) should be developed.

Advantages of e-Recruitment-

- Low cost per candidate, as compared to the physical recruitment process.

NEED & IMPORTANCE OF THE STUDY

It's considered to be effective because it saves time, effort and moreover it can confirm that suitable person is hired for a selected position. Therefore, the foremost purpose of our study is to spot about the way of e-recruitment and internet is influencing the recruitment process of a corporation.

STATEMENT OF THE PROBLEM

The recruiting companies will be able to know what e-recruitment process has been improved and what hasn't been. In e-recruitment process the most improved stage is screening stage. So, the recruiters can undertake steps for making other recruitment stages more improved and efficient. Along with this, when the Human resource department will desire to make a new policy for improving the recruitment stages, this study is supposed to guide them showing which stage needs to be focused more and what problems are generally faced by the employers. Some generated solutions may guide the new policy making as well.

OBJECTIVES OF THE STUDY

- To assess the role of e-recruitment of quality of the applicants.
- To study the role of e-recruitment in providing a wider choice of talent.
- To study the role of e-recruitment on employee.
- To study the attitude & perception of employees related to e-recruitment.

SCOPE OF THE STUDY

The scope of the study is to appear at the E-recruitment techniques adopted by the corporate. Except for getting a concept of the techniques and methods within the recruitment procedures an thorough look are visiting be taken at the insight of present condition of E-Recruitment prevailing within the E-Recruitment is a new technological means for selecting one of the companies' most crucial resource, i.e, human resource. Recruitment has become an important process in the highly competitive labour market.

The traditional methods of recruitment has been revolutionized by the wave of internet.

E-recruitment is an integration and use of internet technology to improve competence of recruitment process. Furthermore, better and faster recruiting can constitute a competitive advantage against enterprises from the same market. However, web-based recruitment is now sufficiently widespread to represent a disadvantage for companies

RESEARCH METHODOLOGY

Research methodology is a way to systematically solve the research problem. It may be understood as a science of studying how research is done systematically. The methodology may include publication research, interviews, surveys and other research techniques and could include both present and historical information.

☐ **TYPE OF RESEARCH**

Descriptive Research

☐ **SOURCE OF DATA**

The task of data collection begins after research problem has been defined and research design chalked out. While deciding about the method of data collection to be use for the study, always keep in mind techniques for collecting the information must be devised. Several methods like Analysis of research paper, examination of records, etc. there are two types of data collection method:

Both primary and secondary data are used for the study.

☐ **PRIMARY DATA:** Data is collected from survey method with the help of questionnaire.

☐ **SECONDARY DATA:** Data are collected from books, journals, company manuals, company website.

☐ **SAMPLE DESIGN:**

HYPOTHESES FOR THE STUDY

H0: HR Recruiters does not have a positive perception of improvement of e-recruitment process

H0:1 HR Recruiters has a positive perception of improvement of e-recruitment process.

Non probability sampling design Convenience sampling design

Convenience sampling was used for the survey. Approx. 100 employees were selected as a sample. The questionnaire were distributed to the respondents in the selected sample in company AEGIS BPO 40 responses were received via e-mail.

☐ **SAMPLE UNIT**

AEGIS BPO MANPOWER

☐ **SAMPLE SIZE**

100 People

HYPOTHESIS

Ho – There is no relationship between corporate image for e-recruitment and the large pool of candidates collected through e-recruitment

H1 - There is relationship between corporate image for e-recruitment and the large pool of candidates collected through e-recruitment

LIMITATIONS OF THE STUDY

- This study is based on a limited survey where the survey is conducted on the HR Recruiters of **AEGIS BPO** in Hyderabad.
- The study is time bound, and may not be applicable after the passage of time.
- The organization follows other source of recruitment.

CHAPTER-II

REVIEW OF LITERATURE

REVIEW OF LITERATURE

Dr.Sayel sabha, “Impact of Online recruitment on recruitment”, this study tested that the Recruitment has become an important process within the highly competitive labor market. The quality methods of recruitment had been revolutionized by the emergence of the online. E-Recruitment is that the foremost recent trend within the recruitment process and it has been adopted in many organizations from large to small-sized companies. Many companies use E-Recruitment to post jobs and accept resumes on the online, and correspond with the applicants by-mail. (2) Masese Omete Fred, Dr.Uttam M. Kinange, “Effectiveness of E-Recruitment in Organization Development”, Management and Economic Journal, 2018, This study identifies online recruitment methods from relevant literature, and describes how their benefits of online recruitment can influence the recruitment deciding of the organization. Today, one among the foremost crucial sources of competitive advantage relies on human resource efforts through attracting and retaining talented individuals. the aim of this paper is to broaden the research on the online Recruitment practices for the full development of the organization with concentrate on E- Recruitment practices (3) Nafia Sultana, Nahida Sultana, “Analysing the Effectiveness of Online Recruitment: A Case Study on Recruiters of Bangladesh”, Research gate publications, 2018, volume 7(2), ISSN 2305-8730, pp. 79-84, this paper is about present organizations that became more online-dependent while dealing the human resource management activities. The research not only identified the efficacy of online recruitment but also discover the stage of recruitment during which organizations get more benefits through using the web (4) Piana Monsur Mindia, Md. Kazimul Hoque, “Effects of E-recruitment and internet on recruitment process: An Empirical study on Multinational companies of Bangladesh”, International Journal of research and Management (IJSRM), Volume 06, Issue 01, 2018, ISSN (e): 2321-3418, this journal concluded that the Recruitment process is extremely much crucial to every organization, because it's the oldsters that will contribute strategically and make difference within the workplace. Moreover, through the data collection process, it absolutely was also identified that, there are some loopholes present within the e- recruitment system, so these loopholes are visiting be covered by using traditional methods. This study will further help the human resource managers to identify the relevant factors which may be taken into consideration within the strategy of overall recruitment. (5) Mr. Muhammad Assad ul Mujtaba, Dr. Muhammad Shaukat Malik, “Impact of E- Recruitment on Effectiveness of HR Department privately Sector of Pakistan”, International Journal of Human Resource Studies, 2018, volume 8(2), ISSN 2162-3058, This research paper aims at exploring the impact of latest technological developments (especially the concept of E-Recruitment) within the context of recruitment and also the way it's facilitated the fashionable day HR managers. The result has proved that E-recruitment has significant impact on effectiveness of HR Department privately sector of Pakistan.

(6) Prakash Yadao Khillare, Smita Kashinath Shirsale, “A Study of Conceptual Framework of Recruitment in Current Business Scenario”, International Journal of Research in Management, Economics and Commerce, 2017, Volume 07(1), ISSN 2250-057X, pp.35, This paper aims to debate the concept, nature,

problems, benefits, methods and trends and conditions permanently electronic recruitment. Slight research has been undertaken to confront what has been published within the sphere up to now. (7) Anand J and Dr. Chitra Devi S, “The Impact of E-Recruitment and challenges faced by HR Professionals”, International Journal of Applied Research, 2016, volume 2(3), ISSN 2394-7500, pp. 410-413, the study is about the electronic recruitment that's prevailing within the HR professionals. Many organizations intentionally in evaluating e-recruitment for his or her growth and feasible, to source right person for right time with right cost. (8) Md. Sajjad Hosain, Kazi Tareq Ullah, Md. Mohan Khudri, “The Impact of E-recruitment on Candidates’ Attitudes: A Study on Graduate Job Seekers of Bangladesh”, Journal of Human and discipline Research, 2016, Volume 8(1), ISSN 2331-4974, this study implies about the impact of E-Recruitment on candidates Attitude. Judgment sampling has been take on to recruit the respondents from the qualified job applicants. At the identical instance, the academicians are expected to appear out a totally unique window to be explored. (9) Anand J and Dr. Chitra Devi S, “Literature review on e-recruitment and its perceived benefits: A walk towards paperless HR”, International Journal of Applied Research, 2016, volume 2(11), ISSN 2394-7500, pp. 528-531, The aim of this paper is to test the perceived benefits of e-recruitment from the aim of view of the HR managers. additionally to the above discussion, never-ending improvement in considering the technological issues related to E-Recruitment is extremely recommended. (10) Rozy Rani, “E–Recruitment and its impact upon on job seekers: a up to date Approach” Semantic scholar.org, 2016, Volume 2(4), ISSN 2395-4396, The study implies that the developers of online job sites have to provide additional useful functionalities or tools on the sites to assist users for job search. The paper provides an insight for job seekers to seek out employment by using the web as employment search tool. The main findings emerging out of this study is that job seekers are getting benefited with the web era, and begin searching the roles on the web. Some job portals offer resume building facilities also in order that job seekers can get advantage of this. Last we are able to say that the web has been accepted as a most convenient & better tool to seek out the roles. (11) Lakshmi S. L, “e- recruitment: a boom to the organizations within the competitive world This study has explored the effectiveness of using e- recruitment in organizations. It’s been found that e- recruitment is effective in terms of saving recruitment cost, reducing time to rent and helping companies in developing competitive edge, market image and attracting right skilled candidates. Online recruitment is additionally effective in terms of managing talent process that's also considered

AREA OF RECRUITMENT RESEARCH

Breaugh and Starke (2000) integrated numerous theories on recruitment and constructed an organizing framework of the recruitment process to highlight the complexities involved, and help identify research directions for recruitment literature. The framework, acknowledged by Breaugh and Starke (2000)

As being a simplified view of reality, identified five key stages of the recruitment activities, intervening/ process variable (e.g. Applicant interest, message credibility, accuracy of applicant's expectations) and recruitment results. A review of this framework will help clarify the diverse and complex elements that must be considered by organization when instigating a recruitment process.

Breaugh and Starke (2000) believe that the stages of the recruitment process should be the establishment of objectives. In the past the one clear goal for the majority of organizations has been to attract a large number of candidate (Wanous, Poland, Premack, & Davis,1992) irrespective of the quality and fir that these potential applicants have with the organization. The simple goal has been challenged by researchers for a number of reasons (ie. Financial costs and time involved in processing applications and identifying potential candidates from unsuitable candidates) who suggest that organizations would benefit from considering a wider range of objectives that focus on what the organization is ultimately trying to achieve (Breaugh & Starke,2000; Dessler,2002; Rynes, 1991).

Establishing recruitment objectives involves asking some fundamental questions, the first and foremost important of which should be: what type of individual (Knowledge, skills and abilities) does the organization want to hire? (Breaugh & Starke,2000). The initial assessment of the organization's and the position's target market is of primary importance in the recruitment process as acknowledged by a wide range of researchers (Berry,2004; Dineen, Ash, & Noe, 2002; Feldman et al., 2002; Galanki, 2002; smith et al., 2004).

To identify the recruitment objectives, key consideration for organization includes defining the desired longer term goals with respect to the retention of new hires, their job performance, and their job satisfaction; establishing the amount to be expended during the recruitment process and the speed with which the position/s need to be filled; defining workforce diversity goals if relevant; and, establishing recruitment objectives will strongly impact the reminder of the recruitment strategy and the overall success of the recruitment process (Courtis,1994; Dessler, 2002; Sessions, 2006).

In establishing recruitment objectives, organizations may want to focus on common themes that have been identified in previous literature, those of post-hire and pre-hire outcomes. Some researchers stress that post-hire outcomes such as the cost recruiting, the speed with which jobs are filled, and job satisfaction and performance of new employees should be the primary consideration of the organizations

(Breaugh, 1992; Breaugh & Starke,2000).

The second stage of the recruitment framework involves the formulation of a recruitment strategy which is influenced by the responses from the first stage. Consideration for the organization revolve around where the organization should recruit from; what recruitment sources should be utilized; when the recruitment process should be undertaken; and what message the organization wants to convey to potential candidates (Breaugh et al., 2000). The recruitment message is crucial in the recruitment process as what the employer can offer applicants is just as important as how an organization undertakes recruitment (Langan, 2000). Overall consideration and identification of responses to these areas will lead to the development of a sound recruitment strategy and the implementation of recruitment activities that will achieve desired objectives (Rynes et al., 1990).

Identified as the third stage within the recruitment framework by Breaugh & Starke (2000) are the recruitment activities undertaken by the organization. These activities encompass the establishment of the recruitment advertisement and recruitment message, the final advertisement of the position through previously identified recruitment sources, and the engagement of relevant recruiters internal to the organization to coordinate and participate in the selection process.

Stage four of the recruitment framework relates to the intervening/process variables. These variables have been identified within the recruitment research as potentially influencing the relationship between recruitment activities and recruitment outcomes.

The final stage of the recruitment framework as identified by Breaugh and Starke (2000) is the recruitment result stage. This stage captures the review and assessment of the success of the recruitment process that organizations should undertake by comparing outcomes with recruitment objectives. This stage can provide invaluable information to the organization by highlighting both the successful & successful component of the recruitment strategy established. Within the recruitment results stage the immediate outcome of the job

offer and acceptance is the primary recruitment outcome incorporated into the present research model.

E-RECRUITMENT: -

The rapid advances in technology have dramatically changed the way business is conducted and this increasing use if and reliance on technology is clearly demonstrated by the number of organization and individuals who utilize the internet and electronic mails. The impact of technology on business is further reflected by the continues rise in amount of literature exploring the effect of new technology development and implementation on the efficiency of the business, including the impact on human resources practices(Cullen,2001; Dessler,2002; Dineen, Noe,& Wang, 2004; Smith et al., 2004). In particular, the adoptionof the Web as a medium by organizations has been faster than any other medium in history (Bush et al., 2002).

This is demonstrated by the fact that while it took more than 30 years for radio as a medium to reach 50 million listeners, the Internet reached 50 million users within five years (Kerschbaumer, 2000).

In terms of human resources management, the Internet has changed recruitment from both an organizational and

a job seekers point of view (Epstein et al., 2003; Feldman et al., 2002; Warner, 2005). Traditional recruitment processes are readily acknowledged as being time-consuming with long hiring cycle times, high costs per process and minimal geographical reach (Lee, 2005). In contrast to this, the rapid introduction of the Internet into recruitment processes can primarily be attributed to the Internet's unrivalled communication capabilities which allow for written communication (e-mails and documents) to be transmitted in a second; for organization's and individual's web-sites to be accessed at the click of a mouse and for real time conversations (print, audio and visual) to be conducted in an instant (Bingham et al., 2002; Wyld, 1997). This communication is quick, easy and cheap and its reach is on a local, national and international scale. Within developed countries it is reported that more than 75% of Human Resources professionals utilize Internet recruitment methods (i.e. Internet job boards) in conjunction with more traditional recruitment methods, such as newspaper advertisement and employee referrals (Anonymous, 2000). Among job seekers, an estimate one in four utilize the internet to source job opportunities (Smith et al., 2004). Further evidence of the growing use and reliance on e-recruitment was documented in a study undertaken by Lee (2005) who found that all of the Fortune 100 companies as listed by the 2003 Fortune magazine used some form of e-recruitment to advertise position vacant. The popularity of the internet as a recruitment source now sees a variety of position being dvertised on the internet, from traditionally blue-collar/trades types roles, to white collar & professional positions (Baxter, 2005). Wyld's (1997) prediction that "the Internet may well be transforming forever the way corporations recruit employees and the way individuals hunt for jobs" has certainly come to fruition in today's workforce. Indeed, the popularity of the internet as a means of sourcing job should continue to rise following the recent approval of a "jobs" domain in the United States (Pont, 2005).

Such a move could vastly reduce the costs of corporate recruiters who current pay fee to post jobs on commercial job boards, and has the potential to take the commercial job boards out of the market if they are unable to capitalize on it (Zappe, 2005).

Bulter (1991) [5] suggested this entailed utilizing the inductive methodology for the generation of items of the perceived benefits of e-recruitment. Semi-structured conversations with a number of 30 human resources managers and 10 recruitment supervisors from numerous industrial and services –oriented sectors were conducted. Participants were questioned to grade the benefits of e-recruitment that they supposed based on their experiences and interaction. The outcomes were progressive and used for the generation of the objects. Common interview responses were brief as: low costs, less time, ability to influence applicants from various countries, improved quality of applicants, and sound image for the organization. Whitford, M. (2000) [6], This U.S. based study states the benefits of internet for recruitment, the distress being maintenance of employee. The internet plays a vital role in closer recruitment.

(Cober et al., 2000) , Online recruiting can also produce cost savings and higher applicant earnings. Companies have reported savings of 95% when changing from modern to online recruiting causes and discrete companies have generated as many as 10,000 applicants through their recruitment web sites to fill less than 1000 jobs.

(cf. Cober et al., 2000) , According to the current research on the recruitment, the Web is increasing in use both as a source of applicants for organizations and as a job search device for individuals looking for employment. As many as 90% of large organizations in the United States have incorporated the Web in their current recruitment practices. (Mohamed, 2002; McDougall, 2001; Baille, 1996;) [8] e- recruitment provides global reporting at a constant foundation. Lin and Stasinskaya (2002) [9], These suggestions have been sustained by the CIPD (2006), in that 71% of their survey respondents used erecruitment to reduce recruiting costs, 60% to extend the selection pool and 47% to improve the speed of time to employ. Eleanna Galanaki, (2002) [25], Online recruitment is a new tool, at the removal of the HR departments, which has known a impressive success in very short time. This paper presents the findings of some expressive research, involving UK IT companies. The research tries to identify the effect that the perceived characteristics of the research have on the decision of companies to recruit through the Internet. The attributes tested are cost efficiency; recruitment cycle time; response rate; quality of response; impact on the image of the company; directing of specific niches; targeting of the passive job-seeker; worldwide coverage; essential resources, time and effort to implement; attraction of the mean to the job seekers (especially IT professionals and young graduates); risk of excess of answers; and impact of the size and reputation of the company. The paper provides an insight on how the companies recognize and value online recruitment

Boswell, Roehling, LePine, & Moynihan, (2003) [10], attentive on opportunities to meet people and site visit measures. A theoretical paper on Managerial challenges of e-recruitment: extending the life cycle of new economy employees by Smith and Rupp (2004), studied the application of technology to recruiting

and retaining knowledge workers in an e-commerce, information intensive environment. The authors reported that recruitment as a general process is job specific and offers computer-assisted screening interviews and statistical estimate to aid in reducing recruiting costs, time-to-hire and employee business.

Alan D. Smith, William T. Rupp, (2004) "Managerial challenges of e-recruiting: extending the life cycle of new economy employees". The study conducted by Connerley, Carlson, & Mecham (2003) [12], on evidence of differences in applicant pool quality statements the research need by examining the attraction outcome of firms opposing head- to-head for recruits for similar positions. This study studied applicants for on-campus interviews with corporate recruiters at a southeastern university from September 1999 to May 2000. Results of an analysis of 391 applicant pools representing 18 different job families suggest that applicant pool quality can vary significantly within and across job families.

Cober, R., Brown, D., Keepin, L., and Levy, P. (2004) [13], For e-recruitment, organizations is building their own web sites ever better because of the higher costs of marketing and the ease and speed of finding more qualified applicant. Hadass (2004) [14] in his research on the effect of internet recruiting on the matching of workers and HR Managers developed a model of recruitment in which job searchers have private information about their condition for different jobs and firms possess deficient screening technologies. He decided that firms may adopt e-recruitment policies because of the direct reduction in recruiting costs and because of competition among HR Managers for skilled hires.

Reeve, Highhouse and Brooks (2006) [15] investigated how affective reactions of job searchers affect overall evaluation of organizational appeal and organizational image.

A survey conducted by marketresearch.com (2006) [16], on the E- Recruitment market, found that the, major trends of e- recruitment were:

1. More advanced tools for candidate management on corporate career sites;
2. Increasing use of social networking technologies (Facebook, LinkedIn) to reach candidates; and
3. More opportunities for specialists in the market. A research by Matthews (2006) [17], on the recruitment of law students by the United States Internal Revenue Service designated that how by moving up the start data of its campus recruitment energies it was able to fill jobs more easily and with better quality entities.

Barber (2006) [18], at the Institute for Employment Studies also examined the assistances and challenges of Internet recruiting. Barber noted that access to a wider pool of applicants and promotion of a company's repute and brand are frequently mentioned by HR experts who analyzed the strengths of the e-recruiting.

Maurer and Liu (2007) [19], that web-based recruitment protects cost up to 87% per new employee employed by an organization. Parry and Tyson (2008) [26], conducted a study on the recruitment activities of establishments for a period of six years with the use of survey and interview methods, questions were asked as to why the respondents exploited or did not employ online recruitment, whether they predicted their use of

the Internet for recruitment to change, and what impact they expected Internet recruitment to have on the use of other recruitment methods. Human Resource directors and managers, finance directors, managing directors and recruitment experts from a sample of UK organizations with over 25 employees were the respondents of the study. There were 25,524 responses in the survey and twenty (20) HR or resourcing managers were cross-examined. The results of the survey showed that the most common reasons of using profitable or commercial websites in their recruitment were cost-effectiveness (75%), ease of use for candidates (64%), a larger candidate pool (53%), ease of use for the organization (52%), speed to hire (52%), and company policy (50%). On the other hand, the less common reasons were success in finding candidates (44%) and keeping ahead of competitors (32%).

Thompsons, L., Braddy, P., and Wuensch, K. (2008) [20], In 2008 studied the influence of organizations, web design on potential jobseekers 182 participants reviewed an online job marketing to rate marketing formatting attractiveness, usability of the website, organization web appeal, impressions of the organization, and readiness to pursue employment and found that both the formatting attractiveness and usability of online recruitment materials influenced participants' inclinations to pursue jobs, planning was more important than usability.

(Kim et al, 2009) [21], Through the review of the prior literature on the e-recruitment supposed benefits, there Searcher determined the following named benefits: shorter recruiting cycle time, ability to reach a wider scope of applicants.

Holm, Anna B. (2012) [22] further states it as the organization of recruitment process and activities, which, by means of technology and human causes, enable time-and- space dependent collaboration and interaction in order to recognize, attract, and influence capable candidates. Avinash S. Kapse (2012) [1] published an article about E recruitment which stated that online recruitment has many advantages to companies like low cost, less time, quick, wider area, better match and along with this they have highlighted some points of disadvantages of online recruitment like scrutinizing applications is a problem, lack of internet awareness in India in some places and they said that employers want to have face to face interaction with candidates.

Florea, N. V., & Badea, M. (2013) [23], The author references that use of internet helps in performance advance, faster decision making and saves cost. The internet helps in displaying vacancy on the website. The internet also helps in finding the precise employee for the job from the pool of information obtainable in the data base.

A paper was recently presented at an international conference by Florea & Badea (2013) [2], which emphasized the manner in which the organizations use technology increases or decreases its positive net effect. The findings suggest that through the Internet, HR can develop an effective recruitment program, which helps

manage the highly competitive and time-consuming process of finding skilled personnel.

Haroon and Zia-ur-Rehman (2010) [3], also investigated online recruitment in Pakistan. A total of sixty-five (65) respondents from small and large firms of the different sectors of the industries in Pakistan participated in the study. Data were collected through telephone interviews showed that preference was given to small firms as compared to large firms in terms of using internet recruitment. They also showed that large firms had their own websites and use them for recruitment as compared to small firms. They also revealed that online recruitment became a new medium that was going to replace the other traditional sources of recruitment because online recruitment offered reduced recruitment costs, time-saving capability, quick response features in checking application status, and online resume development.

Ghadeer Mohamed Badr ElDin Aboul-Ela (2014) [24]

- a) Saves Time: e-recruitment is associated with time efficiency, this is emphasized in the reduction of time consumed when compared to the traditional recruitment methods, the time needed for the recruitment process becomes shorter, and the time consumed to analyze the collected data is reduced which in return will fasten the selection process.
 - b) Geographical Outreach: e-recruitment helps the organization to reach more applicants, more geographical locations, makes the process simpler through the usage of technology, and facilitates the process of reaching a wider diversity of applicants through various recruitment sources.
 - c) Saves Efforts: e-recruitment will allow the organization to save efforts through the utilization of technology thus allowing for the allocation of these human efforts in other areas which in return may improve the overall efficiency.
 - d) Improved Quality of Applicants: e-recruitment gives the organization the chances to attract more qualified and competent applicants, reduces the costs associated with attracting unqualified applicants, and makes the process of filtering the applicants easier through the adoption of technology.
- Sound Organizational Image: e-recruitment creates an improved and a sounder image for the organization thus, allowing the organization to reach more qualified applicants.

Subhashree and Vasantha (2020), A research by several organizations on the impact of IT infrastructure and IT knowledge on EHRM adoption. Such E-HRM adaptation affects many industries and IT infrastructure developed in an organization. With the support of the HR department, workers chose to follow E-HRM with the company using the trend to adopt it. Finally, Subhshree concludes by mentioning that an entity would be higher in E-HRM adoption.

Kamalasaravan (2019), A research has been performed on the efficacy of the recruitment of career portals & networking sites. In this research, he shares in an organization a real picture or real work-life balance of the employees. In other words, you can also assume that the workers who work in a recruiting team face

problems. In many MNCs, they perform a telephone interview to filter the applicants via contact. But this method, on the other hand, should not be encouraged. They should switch directly for a face-to-face interview to create successful applicants. Uh, Dr.S.Kamalasaravan notes that the origins of recruiters are Candidates from work portals and via a certain guide as well. They get an opportunity when referring certain applicants, but if the candidates are referred the nominee relieves the company.

Natia Sultana (2018), Many countries are now launching in India for a few days, and such MNCs rely more on the Internet with the help of a human resources team. MNCs prefer online recruiting via social media, which reaches many people at a time, as the days go faster and better. Via the chosen profiles It makes it easier to attract and work to pick candidates from a larger pool. The use of knowledge of technology, web-based sources for sourcing, screening, cross-examination filtering helps select the best candidate with lower costs decreases the workload. This form of selection draws more passive job seekers and also increases an organization's preference.

P. Sivasankari (2018), Research on E-recruitment was performed to web-based technology, which is equivalent to online recruitment. In the current situation, MNC's are using the internet to catch the youth's interest. Via work posting, several crowds can be reached via social media messages. As a consequence, he/she must endure multiple crucial circumstances once the nominee is chosen. As a consequence, he/she must endure it once the nominee is picked. Different critical circumstances. Some are relocated and moved to another location based on experience. Thus, through its actions and cultural change, E-recruitment goes ahead by achieving its objective.

Jayanty Kuppusamy and Jaya Ganesan (2016), Published a paper on E-recruitment among job seekers of generation Y stating that the company should concentrate on factors such as adaptability of the recruiting period, knowledge accessibility, internet accessibility, website usability, and cost-effectiveness to ensure the effectiveness of E-recruitment. With the internet, Generation Y has grown up. They are tech-savvy, are engaged in the hunt for jobs in the job market, and these factors allow them to apply either through job portals or company websites via online recruitment.

Maryam Taresh Saif AlMarri (2015), The influence of print ads and websites on the attractiveness of candidates was explored by showing how these recruitment workouts work with each other. The analysis indicates that, relative to print advertising, websites have a significant effect on attracting potential candidates. The study shows that blogs and advertising campaigns have an indirect effect on the attractiveness of candidates that business data interferes with. Printed promotions often complement the web's positive results and, thus, the synchronous usage of different recruiting activities directly affects the interest of candidates.

Dr. Ankita Jain, Ankita Goyal (2014), E-HRM has been studied as a progression in which all HR plans, policies, and practices are performed using an online medium. E-recruitment is an online platform

through which job seekers can apply online for vacancies. Job applicants can attach their curriculum vitae and application form here. As well as the recruiters can get the candidates' details.

Mary Grace G. Ventura and Rex P. Bringula (2013), online recruitment is being analyzed to change the way businesses recruit their employees. As a basic business process, online recruitment is the elimination of complex and unnecessary paperwork and the adoption of simplified workflow systems and secure database systems. Applications, and powerful channels of contact between job seekers and executives.

Ms. D. Shahila (2013), The approach has been used in the labor market in a highly competitive manner. E recruiting is the latest development in the process of recruitment, and in many organizations, it has been embraced. The complexities and problems of Erecruitment in a company's recruitment process are growing in scope. The pedagogical goals are to consider patterns and behaviors, to compare the conventional method of recruiting, to examine the potential of e-hiring. Interchangeable recruitment.

Naveed r. Khan, marine Awang, Arsalan Mujahid ghouri (2013), The efficacy of E-recruitment depends on the placement of ads and the most influential motivator for seeking interest in the work applied is salary. Finally, study statistics showed that the origins of recruitment and the expectations of a job by the candidate greatly affect the decision to accept the role applied by the job seeker.

Aakash Gopalia (2012), Online recruiting allows exchanging knowledge easily, to reveal business Reputation, and enhancing the candidate's consistency. Finally, Aakash gopalia concludes by mentioning that recruiting from Tesco has helped to find and develop a further approach theory. Internet recruiting is reliable and saves money and reduces time and also helps in crucial situations.

Recruitment is age old process. It started even before industrialization, probably with the inception of agriculture. With the wide acceptance of internet and online tools, online or e – recruitment has also been there since last two decades but it has not yet reached its full potential as yet. The researchers try to understand the concept of traditional and e-recruitment here in this paper and find solutions to this burning problem because even with this great tool the problem of unemployment or the gap between demand of skilled workforce and supply still persists in India.

The first references to e-recruitment Appeared in mid-1980s.

E-recruitment can be divided into two types:

corporate web sites for recruitment and commercial jobs boards/portals (such as monster.com) for posting job advertisements. Commercial websites are a company's own website with a linkage for job posting and career options where aspirants can log into for current job openings. If the company advertises its vacant positions on other websites that specialize in recruitment such as - naukri.com, monster.com, etc., the companies would be adopting commercial job boards for recruitment. Companies and hiring agents have made much of their recruitment process online to improve the overall recruitment process speed. Using an online e-Recruitment system may potentially save the employer's time as usually they can rate the Candidate and several persons in HR independently review the candidate's profile. Recruitment agencies also use a method of e-Recruitment by using cloud based SaaS service. There is several recruitment software available online which reaches large pool of candidates and is time effective but it may fetch many unqualified candidates and may not increase the diversity and mix of employees. In terms of HRM, the internet has drastically changed the recruitment function for both job seekers and providers. Conventional recruitments very time-consuming with high expenses and limited geographic reach. E recruitment doesn't have those limitations, rather it has wide reach. Currently recruiters are also focusing on social media sites for potential candidates.

CHAPTER-III
COMPANY PROFILE
INDUSTRY PROFILE

COMPANY OVERVIEW

ABOUT:

Founded about 30 years ago in the US, **Aegis** is a all-around business casework and acquaintance administration aggregation that helps all-around brands bear bigger chump adventures via able aback appointment support. Over the endure three decades, Aegis has added its portfolio of solutions to ambition the advanced ambit of business and chump interactions. With a attendance in 13 countries, 56 locations, and with added than 55,000 employees, Aegis manages over a billion chump interactions with the advice of its aback appointment solutions every year for over 300 audience beyond verticals such as BFSI, Telecom, Healthcare, Travel and Hospitality, Chump Goods, Retail, and Technology. Aegis manages, enables, extends, and enhances business adventures for its audience and their barter beyond consulting, technology, outsourcing, and training and education.

In acceptance of its three decades of administration and expertise, Aegis has won abounding accolades, including the “Best Contact Centermost Casework Provider” by Frost & Sullivan (APAC), “Top All-around BPO” by All-around Services, and “Best Employer Award” by Aon Hewitt.

The aggregation as well continues to be ranked a allotment of the top 5 providers of business casework in assorted rankings beyond the globe.

Aegis is wholly endemic by the Essar Group, a USD 27 billion conglomerate

Parent company: Essar Group

Essar All-around Limited, the ancestor aggregation of Aegis, is a business affiliation with a counter-balanced portfolio of assets in the assorted adeptness and casework sectors of steel, energy, power, communications, shipment ports and logistics, and construction. Privately endemic and professionally managed, Essar has judiciously invested in the commodity, adeptness and casework business segments.

A adeptness of success

Aegis’s adeptness is different in agreement of acquainted its advisers as the foundation of its success. We beforehand in our humans because we admit their accent in our partnerships with clients. In the basic business environment, there is no aberration amid your aggregation and ours; added importantly, there is no aberration amid your chump and ours.

A foundation for beforehand

Aegis has congenital its amount hypothesis not as a account provider but as a applicant partner, with its adeptness to do the following:

Provide customized supply solutions based on your requirements.

Utilize an avant-garde supply access that involves compassionate you and your barter and markets.

Bring calm the best aptitude to design, apparatus and administer the solutions offered.

Enable action improvements application industry benchmarks and accepted aloft processes.

Help you to accomplish chump achievement by always leveraging our adeptness base.

VISION, MISSION AND VALUES

Vision

“At Aegis we anticipate to consistently innovate in adjustment to accept aloft beheading for our clients, there by creating abundance for all the stakeholders.”

This eyes is added articulate through the acronym VIEW, which guides our thoughts, affairs and actions, a could cause for our adeptness and chump focus and a brand from the actual beginning.

Mission

At Aegis, our vision, VIEW, provides a framework for our operations. To accomplish our goals, we access this aggregation eyes with the mantra — blessed employees, blessed barter and blessed shareholders.

Happy advisers

Provide accelerating opportunities and platforms that breeding humans to participate, apprentice and absolve abundance through connected and accordant engagement.

Happy customers

Co-create with our barter and accommodate them aloft amount through our all-around supply belvedere and a chic of account that is customized and avant-garde to accommodated and beat their expectations.

Happy shareholders

Provide our shareholders an academy that creates acceptable bread-and-butter amount by calmly managing all classes of assets.

Values

Passionate, responsive, inspiring, innovative, honest, focused, alive and committed.

Aegis brings calm an accomplished aggregation of technology, business and amusing visionaries, business leaders who accept a abysmal compassionate about the activating bread-and-butter and business environment. Our aggregation collectively works appear attaining arete in chump accord management.

The chump account outsourcing needs addressed by Aegis are custom-built to clothing the assorted needs of every area and client. This helps us accommodated our client's expectations and bear aberrant casework that prove awful benign to their business. Chump acquaintance administration has become a acute allotment of every area which business sectors now accept and we advice them accomplish this ambition with our adeptness and accomplished staff.

Click on the pictures to apperceive added about our administration team. If you are clumsy to appearance the pictures, chase the links below.

APARUP SENGUPTA, MANAGING DIRECTOR AND GLOBAL CEO

Aparup Sengupta brings with him an enviable bequest with a admirable able career in the IT and IT-enabled casework domains. He is an administrator with three acknowledged start-ups: 24/7 Customer, India's aboriginal CRM casework company; Ion Idea, an IT casework aggregation based out of Fairfax, Virginia; and Think Harbor, a arch BPO consulting aggregation adjourned by Bank Am and Nomura. During a two-decade continued career, Mr Sengupta has managed circuitous IT projects at CMC for added than eight years, set up India's aboriginal internetworking approach for Microland in Bangalore, India, and orchestrated several re-engineering projects in India and abroad. He has been a affiliate and the Lead Assessor of the Board of the CII Business Arete Award, agnate to the Malcolm Baldrige Accolade in the US and the Deming Prize in Japan. Mr Sengupta has aswell served as the Chairman of the BPO Steering Committee of Assocham, India's arch industry forum. He has aswell been an ambassadorial academic to the US in 1994.

Mr Sengupta is a alum in electrical engineering from the University of Calcutta. Aegis has becoming cogent industry recognition, including abounding awards, over its two decades of existence. Here is a account of aloft awards Aegis has accustomed recently

Global Casework ceremoniousness Aegis in 5 categories in the 2012 GS 100 List

- Leading Mid-tier Infrastructure Administration Vendor
- Top All-around BPO Leaders
- Global Chump Administration Leaders
- Leaders- Specialty KPO
- Industry-specific BPO Niche Leaders

This acceptance highlights company's arresting position a allotment of all-around outsourcing majors and reflects our charge to accommodate aloft chump acquaintance to our customers.

Aegis ranked No 14 in the 2012 All-around Outsourcing 100 by the International Affiliation of Outsourcing Professionals (IAOP)

AWARDS AND RECOGNITION

Aegis has been accustomed as No 14 in the 2012 All-around Outsourcing 100 by the International Affiliation

of Outsourcing Professionals (IAOP). IAOP recognizes the world's best outsourcing casework providers based on their size, growth, client references, authoritative competencies and administration capabilities.

Outsourcing Account Provider of the Year at the Asia Communication Awards 2012

Aegis has been bestowed with the Outsourcing Account Provider of the Year at the Asia Communication Awards 2012. This acceptance acknowledges Aegis' Client Acquaintance portfolio in acclamation the business needs of the telecom vertical and redoing the client acquaintance algebraic for a partner. The Asia Communication Awards recognizes the achievements of Asian telecom companies and individuals amenable for the innovations, achievements and new casework that are allowance to physique tomorrows industry.

2011 MVP Aloft Accolade from TMC's Client Interaction Solutions magazine

Aegis has been awarded with the Silver class MVP Aloft Accolade 2011 by Technology Marketing Affiliation (TMC)'s Client Interaction Solutions anniversary for demonstrating the absolute charge to quality, excellence, and client service. The anniversary has been the articulation of the alarm /contact center, CRM, and teleservices industries back 1982.

Aegis All-around CFO, CM Sharma wins CFO100 award

Aegis All-around CFO CM Sharma won the CFO100 accolade for his "Winning Edge in Strategy" from the CFO India magazine. The CFO100 is an anniversary action to admit India's accounts leader's amazing contributions to the accumulated world. Through a action of choice and board review, CFO India anniversary identifies and brings calm 100 CFOs, who are acutely a cut aloft the others."

INDUSTRY PROFILE

Business process outsourcing (BPO) is a subset of outsourcing that involves the contracting of the operations and responsibilities of a specific business process to a third-party service provider. Originally, this was associated with manufacturing firms, such as Coca Cola that outsourced large segments of its supply chain. BPO is typically categorized into back office outsourcing, which includes internal business functions such as human resources or finance and accounting, and front office outsourcing, which includes customer-related services such as contact center services.

BPO that is contracted outside a company's country is called offshore outsourcing. BPO that is contracted to a company's neighboring (or nearby) country is called nearshore outsourcing.

Often the business processes are information technology-based, and are referred to as ITES-BPO, where ITES stands for Information Technology Enabled Service. Knowledge process outsourcing (KPO) and legal process outsourcing (LPO) are some of the sub-segments of business process outsourcing industry.

In 2010, the Philippines surpassed India as the largest business process outsourcing industry in the world.

After growing 20 percent in 2012, the BPO industry of the Philippines is estimated to gross revenue of upwards to \$25 billion by 2016. By these estimates, the Philippines' BPO industry will account for approximately 10 percent of the nation's GDP.

Benefits and limitations

City panorama showing gardens, clean roads and modern office buildings

HITEC city Hyderabad, India, the hub of information technology companies

The main advantage of any BPO is the way in which it helps increase a company's flexibility. However, several sources[which?] have different ways in which they perceive organizational flexibility. In early 2000s BPO was all about cost efficiency, which allowed a certain level of flexibility at the time. Due to technological advances and changes in the industry (specifically the move to more service-based rather than product-based contracts), companies who choose to outsource their back-office increasingly look for time flexibility and direct quality control. Business process outsourcing enhances the flexibility of an organization in different ways:

Most services provided by BPO vendors are offered on a fee-for-service basis, using business models such as Remote In-Sourcing or similar software development and outsourcing models. This can help a company to become more flexible by transforming fixed into variable costs. A variable cost structure helps a company responding to changes in required capacity and does not require a company to invest in assets, thereby making the company more flexible.

Another way in which BPO contributes to a company's flexibility is that a company is able to focus on its core competencies, without being burdened by the demands of bureaucratic restraints. Key employees are here with released from performing non-core or administrative processes and can invest more time and energy in building the firm's core businesses. The key lies in knowing which of the main value drivers to focus on – customer intimacy, product leadership, or operational excellence. Focusing more on one of these drivers may help a company create a competitive edge.

A third way in which BPO increases organizational flexibility is by increasing the speed of business processes. Supply chain management with the effective use of supply chain partners and business process outsourcing increases the speed of several business processes, such as the throughput in the case of a manufacturing company.

Finally, flexibility is seen as a stage in the organizational life cycle :

A company can maintain growth goals while avoiding standard business bottlenecks. BPO therefore allows firms to retain their entrepreneurial speed and agility, which they would otherwise sacrifice in order to become efficient as they expanded. It avoids a premature internal transition from its informal entrepreneurial phase to a more bureaucratic mode of operation.

A company may be able to grow at a faster pace as it will be less constrained by large capital expenditures for people or equipment that may take years to amortize, may become outdated or turn out to be a poor match for the company over time.

Although the above-mentioned arguments favor the view that BPO increases the flexibility of organizations, management needs to be careful with the implementation of it as there are issues, which work against these advantages. Among problems, which arise in practice are: A failure to meet service levels, unclear contractual issues, changing requirements and unforeseen charges, and a dependence on the BPO which reduces flexibility. Consequently, these challenges need to be considered before a company decides to engage in business process outsourcing.

A further issue is that in many cases there is little that differentiates the BPO providers other than size. They

often provide similar services, have similar geographic footprints, leverage similar technology stacks, and have similar Quality Improvement approaches.

Threats

Risk is the major drawback with Business Process Outsourcing. Outsourcing of an Information System, for example, can cause security risks both from a communication and from a privacy perspective. For example, security of North American or European company data is more difficult to maintain when accessed or controlled in the Indian Sub-Continent. From a knowledge perspective, a changing attitude in employees, underestimation of running costs and the major risk of losing independence, outsourcing leads to a different relationship between an organization and its contractor.

Risks and threats of outsourcing must therefore be managed, to achieve any benefits. In order to manage Outsourcing in a structured way, maximizing positive outcome, minimizing risks and avoiding any threats, a Business continuity management (BCM) model is set up. BCM consists of a set of steps, to successfully identify, manage and control the business processes that are, or can be outsourced.

Another framework, more focused on the identification process of potential outsourceable Information Systems, identified as AHP, is explained. L. Willcocks, M. Lacity and G. Fitzgerald identify several contracting problems companies face, ranging from unclear contract formatting, to a lack of understanding of technical IT- processes. BPO is a sector which is processed business from outsources.

A BPO hub in DLF Cyber City in Gurgaon, India

IT: The headquarters of Infosys, India's third largest IT company, is located in Bengaluru.

India has revenues of US\$10.9 billion[24] from offshore BPO and \$30 billion from IT and total BPO (expected in FY 2008). India thus has some 5-6% share of the total BPO Industry, but a commanding 63% share of the offshore component. This 63% is a drop from the 70% offshore share that India enjoyed last year: despite the industry growing 38% in India last year, other locations like Philippines, and South Africa have emerged to take a share of the market.[citation needed] The South African call center industry has grown by approximately 8% per year since 2003 and it directly employs about 54,000 people, contributing 0.92% to South Africa's gross domestic product (GDP).[25] China is also trying to grow from a very small base in this industry. However, while the BPO industry is expected to continue to grow in India, its market share of the offshore piece is expected to decline. Important centers in India are Bangalore, Gurgaon, Chennai, Kolkata, Mumbai, Pune, and New Delhi. In fact, the Philippines has overtaken India as the largest call

center industry in the world in 2010.

The Association of Southeast Asian Nations (ASEAN) countries, along with the People's Republic of China and India—known collectively as ACI countries—are likely to see services like BPO figure strongly in their economies over the medium term. Services trade among ACI countries has been growing at a very rapid rate over recent years, despite starting from a relatively low baseline. Although data are scarce and must be interpreted with caution, an analysis of applied services sector policies in the region suggests there is much policymakers can do to intensify this process, and increase the pace at which the transformation to a service economy is taking place.

Eastern Europe is also an emerging BPO destination. McKinsey & Company reported that in 2010, 33,000 jobs were moved to Eastern European countries.[citation needed] While the overall size of the industry and the number of developers in Eastern Europe is lower than India, the knowledge of European languages like French, Spanish, German, and Italian by many Eastern Europeans, as well as the overall high quality of education in these locations, allows the BPO industry in this region to continue to grow. For example, the region has an estimated 17.2 million people with a tertiary education, compared to 13.6 million in India, making it an attractive choice for BPO, especially if more specialized projects are to be outsourced.

In business, outsourcing involves the contracting out of a business process to another party (compare business process outsourcing). The term "outsourcing" dates back to at least 1981 Outsourcing sometimes involves transferring employees and assets from one firm to another, but not always. Outsourcing is also the practice of handing over control of public services to for-profit corporations. Outsourcing can also be viewed as any assistance from an intermediary that is more capable of or familiar with certain practices than us. It is just a way of seeking for help.

Outsourcing includes both foreign and domestic contracting, and sometimes includes offshoring (relocating a business function to another country). Financial savings from lower international labor rates can provide a major motivation for outsourcing/offshoring.

The opposite of outsourcing, insourcing, entails bringing processes handled by third-party firms in-house, and is sometimes accomplished via vertical integration. However, a business

CHAPTER-IV

DATA ANALYSIS AND INTERPRETATION

DATA ANALYSIS AND INTERPRETATION

GENDER WISE CLASSIFICATION

Source: Primary Data

Gender	No of respondents	Frequency
Male	39	39
Female	61	61
Total	100	100

INTERPRETATION:

From Table 4.1, it is inferred that out of 30 respondents 30% of the respondents are male, 70 % of the respondents are female.

TABLE 4.2

CLASSIFICATION ON THE BASIS OF AGE

Age	No of respondents	Frequency
20-25	21	21
25-30	19	19
30-35	27	27
35-40	18	18
Above 40	15	15
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.2, it is inferred that out of 30 respondents 46.6% of the respondents are of age 20-25, 40 % of the respondents are 25-30, 6.7% of them are 30-35, 3.3% of them belonged to 35-40 age group and 3.3% of them are above 40 years of age.

TABLE 4.3

CLASSIFICATION ON THE BASIS OF EDUCATION

Education	No of respondents	FREQUENCY
School	11	11
Diploma	28	28
UG	26	26
PG	33	33
PH.D	2	2
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.3 it is observed that 26.7% of the respondents has completed their UG, 73.3% are post graduates.

TABLE 4.4
CLASSIFICATION ON THE BASIS OF DESIGNATION

Occupation	No of respondents	Frequency
Executive	39	39
Team Leader	19	19
Manager	14	14
Tell caller	26	26
Admin	2	2
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.4 it is observed that 76.7% of the respondents are Executive, 16.7% , 6.6%, are Team Leader and Manager respectively.

TABLE 4.5

CLASSIFICATION ON THE BASIS OF SOURCING OF CANDIDATES

Websites	No of respondents	Frequency
Job Portals	32	32
E'ee Referrals	21	21
Social Network	16	16
All the above	18	18
Others	13	13
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.5 it is found that 43.3 % of the candidates are sourced from Job portals, 6.7% of the candidates are sourced from Employee referrals, 50% of the candidates sourced by Job portals, Employee referrals and Social network.

TABLE 4.6

CLASSIFICATION ON THE BASIS OF THE FASTEST MODE OF APPLYING JOB

Opinion	No of respondents	Frequency
Strongly agree	16	16
Agree	28	28
Neutral	15	15
Disagree	16	16
Strongly Disagree	25	25
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.6 it is found that 20% of the recruiters strongly agreed, 60% agreed, and 20% neutrally said that online recruitment is the fastest mode for applying job.

TABLE 4.7

CLASSIFICATION ON THE BASIS OF E-RECRUITMENT COST SAVINGACTIVITY FOR ORGANISATION

Opinion	No. of Respondents	Frequency
Strongly agree	24	24
Agree	32	32
Neutral	15	15
Disagree	11	11
Strongly	8	8
Disagree	10	10
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.7 it is found that 23.3% of the recruiters strongly agreed and 60% agreed and 16.7% of them fairly agreed that e-recruitment is the cost saving activity for the organization.

TABLE 4.8

CLASSIFICATION ON THE BASIS OF REDUCTION IN RECRUITMENT COST

Opinion	No. of Respondents	Frequency
Strongly agree	28	28
Agree	18	18
Neutral	10	10
Disagree	6	6
Strongly	21	21
Disagree	17	17
Total	100	100

Source: Primary Data

**INTERPRETATION:**

From Table 4.8 it is found that 40% of the respondents strongly agreed and 50% agreed and 10% of them fairly agreed that e-recruitment reduce the recruitment cost.

TABLE 4.9

CLASSIFICATION ON THE BASIS OF REDUCTION IN EMPLOYEE TURNOVER

Opinion	No. of Respondents	Frequency
Strongly agree	32	32
Agree	12	12
Neutral	19	19
Disagree	15	15
Strongly Disagree	22	22
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.9 it is found that 13.3% of the respondents strongly agreed, 20% agreed, 63.3% fairly agreed and 3.3% disagreed that e-recruitment leads to reduction in employee turnover.

TABLE 4.10

CLASSIFICATION ON THE BASIS OF JOB PORTALS & SOCIAL NETWORK MORE ACCESSIBLE

Opinion	No of respondents	Frequency
Strongly agree	22	22
Agree	19	19
Neutral	31	31
Disagree	15	15
Strongly Disagree	13	13
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.10 it is found that 63.3% of the recruiters strongly agreed and 36.7% agreed that job portals and Social networking site more accessible for the candidates.

TABLE 4.11

CLASSIFICATION ON THE BASIS OF QUALIFIED CANDIDATE INCOMPETITIVE MARKET

Opinion	No of respondents	Frequency
Strongly agree	24	24
Agree	16	16
Neutral	32	32
Disagree	21	21
Strongly Disagree	7	7
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.11 it is found that 7% of the recruiter strongly agreed, 27% agreed and 46% of them neutrally said the e-recruitment give the quality candidate in the competitive market and 20% disagreed about the quality candidate.

TABLE 4.12

CLASSIFICATION ON THE BASIS OF FOR ORGANIZATION SUCCESS

Opinion	No of respondents	Frequency
Strongly agree	25	25
Agree	19	19
Neutral	23	23
Disagree	17	17
Strongly Disagree	16	16
Total	100	100

Source: Primary Data

**INTERPRETATION:**

From table 4.12 it is found that 10% of the recruiter strongly agreed, 13% agreed and 46.7% of them neutrally said the e-recruitment helps the success of the organization.

TABLE 4.13

CLASSIFICATION ON THE BASIS OF IMPACT OF E-RECRUITMENT

Impacts	No of respondents	Frequency
No. of Successful candidates	32	32
Cost per hire	19	19
Time taken to close position	16	16
Candidate& E'er satisfaction	21	21
All the above	12	12
TOTAL	100	100

Source: Primary Data

INTERPRETATION:

From table 4.13 it is found that 46.7% of the recruiters agreed that impact of e-recruitment are No. Of successful candidates, Cost per hire, time taken to close position, Candidates and employer satisfaction and 30% of the recruiter said that candidate and Employer satisfaction

TABLE 4.14 CLASSIFICATION ON THE BASIS OF KEY LIMITING FACTOR OF E-RECRUITMENT

Limiting Factors	No of respondents	Frequency
Cultural Approach	21	21
Lack of Knowledge	18	18
Internet Usage	22	22
CV over flow	21	21
Commitment of senior mgt	18	18
Total	100	100

Source: Primary Data

INTERPRETATION:

From Table 4.14 it is found that the Key limiting factor are CV over flow, 20% is due to cultural approach, 10% said Commitment of senior management and 2% said that due to internet usage.

15 CLASSIFICATION OF RESPONDENTS ON THE BASIS OF PREFERED OVERRECRUITMENT WEBSITE

The statistical tool Garrett ranking is applied to analyze the preferred online recruitment website type. The table: 4.15 shows, the rank assigned by the respondents for the most preferred type.

S.No	Particulars	Total Score	Rank	Percentage
1	Naukri	2078	I	27.4
2	Shine	1947	II	25.7
3	Magnes Jobs	1510	III	19.9
4	Monster	930	V	12.3
5	LinkedIn	1095	IV	14.48

Source: Primary data

INTERPRETATION:

Table (4.15) defined that the respondents has given the first rank to Naukri, second rank and third rank had been given Shine, Magnes Jobs and fourth, fifth to LinkedIn and Monster respectively.

TABLE 4.16

TABLE SHOWING THE WEIGHTED AVERAGE OF FACTORS INFLUENCING E-RECRUITMENT

Factors influencing E-Recruitment	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)	WX	WX/W	Rank
Qualified Candidates	4	19	7	0	0	117	7.8	III
Cost saving than news paper Ads	7	18	5	0	0	122	8.1	II
Reduction of recruitment cost	12	15	3	0	0	129	8.6	I
Time saving in collecting the quality of resume	3	19	8	0	0	115	7.6	IV
Increase the performance of the organization	5	14	11	0	0	114	7.7	V
Reduction in employment turnover	4	16	9	1	0	113	7.5	VI

From the above table it can be inferred as following

Rank	Factors influencing E-Recruitment
1	Reduction in recruitment cost
2	Cost saving than news paper Ads
3	Qualified Candidates
4	Timesaving in collecting the quality of resume
5	Increase in performance of the organization
6	Reduction in employment turnover

INTERPRETATION:

From the above table it is inferred that the highest ranked factor influencing e-recruitment is Reduction in Recruitment cost and Reduction in employment turnover ranked 6th .

CORRELATION

Correlation between large pool of candidates through e-recruitment and performance of the organization

H₀ = there is no relationship between large pool of candidate and performance of the organization

H₁= there is relationship between large pool of candidate and performance of the organization

TABLE 4.17

		Large Pool of candidates	Performance of the organization
Large Pool of candidates	Pearson correlation	1.00	.27
	Significance		.152
	N	30	30
Performance of the organization	Pearson correlation	.27	1.00
	Significance	.152	
	N	30	30

INFERENCE:

Comparison between corporate image for e-recruitment and the large pool of candidates collected through e-recruitment

- **H₀** – There is no relationship between corporate image for e-recruitment and the large pool of candidates collected through e-recruitment
- **H₁** - There is relationship between corporate image for e-recruitment and the large pool of candidates collected through e-recruitment

TABLE 4.18**Model Summary**

Model	R	R Square	Adjusted R Square	Error of the Estimate
1	0.02	.000016	-.04	.73

a. Predictors: (Constant), Corporate image

ANOVA^b

Model	Sum of Squares	Df	Mean Square	F	Sig.
1 Regression	0.00	1	.00	0.01	.928
Residual	14.96	28	.53		
Total	14.97	29			

a. Predictors: (Constant), Corporate image

b. Dependent Variable: Large pool of candidates

•

Model	Unstandardized Coefficients		Standardized Coefficients	t	Sig.
	B	Std. Error	Beta		
(Constant)	1.94	.37	.00	5.25	.000
CorporateImage	0.01	.15	.02	.09	.928

a. Dependent Variable: Better to avoid sarcastic remarks

INTERPRETATION:

Since the value of P is greater than 0.05 ($0.928 > 0.05$) therefore the null hypothesis is accepted and conclude that there is no significant relationship between Corporate Image and large pool of candidates collected through e-recruitment.

CHI-SQUARE TEST

Comparison between time saving to collect quality resume and the Quality of the candidate

Ho – There is no relationship between time saving to collect quality resume and the Quality of the candidate

H1 - There is relationship between time saving to collect quality resume and the Quality of the candidate

Significance level is 0.05

Test Statistics:

Table 4.19

Statistics	Value	DF	Significance
Pearson Chi square between time saving to collect quality resume and the Quality of the candidate	2.28	4	0.684

INTERPRETATION::

Since the P-value (0.684) is greater than the significance level (0.05), we cannot accept the null hypothesis. Thus, we conclude that there is a relationship between time saving to collect quality resume and the Quality of the candidate

CHAPTER-V
FINDINGS, SUGGESTIONS,
BIBLIOGRAPHY AND CONCLUSION

FINDINGS

- It is found that 70% of the respondents are female.
- It is observed that 46.7% of the respondents fall under age category 20-25.
- It is found that 73.3% of the respondents had completed their PG.
- 76% of the respondents are Executives.
- It is noted that 50% of the respondents are sourcing through Job portals, Social network, and Employee referrals.
- It is found that 46.7 % of the respondents agreed that e-recruitment effective than old traditional method.
- 40% of the respondents agreed that e-recruitment support the qualified candidate in the organization.
- 60% agreed that online recruitment is cost saving activity.
- 50% of the respondents agreed that e-recruitment reduce recruitment cost.
- 63.3% of the respondents fairly agreed that e-recruitment leads to reduction in employee turnover.
- It is found that 63.3% strongly agreed that applying through job portal and Social website more accessible for the candidates.
- It is observed, 46.7% of the respondents neutrally agreed that e-recruitment give qualified candidate in the competitive market.
- It is inferred, 46.3% of the respondents neutrally agreed that organization get success through e-recruitment.
- It is found that 46.7% of the respondents agreed that no. of successful candidates, cost per hire, time taken to close position and candidate and employer satisfaction are the impact of e-recruitment.
- It is observed that 63.3% of the Key limiting factors of e-recruitment are CV over flow; especially those not match with job profile.

SUGGESTIONS

Based on the above findings the researcher recommends that:

- Monthly analysis of this process be made like how genuine are the profile, how many candidates have been placed.
- E-recruitment multiple level of security to avoid duplication, and genuine profiles.
- Very secured online chat is advisable for the recruiters and the candidates for handling enquiries.
- Reduced time to time hire ,e recruitment allows for immediate real time interaction 24*7 job search activity. It is most important in e recruitment .
- Reduced cost of hire , costs of posting jobs and searching for candidates on job portals can be up ton 90% lower than the costs of using traditional search firms or advertising methods.
- Wider reach for employers it is also one of the important of e recruitment
- State of the art filtration tools are very important
- Branding opportunity for employers
- Sophisticated management tools are important
- Allows for confidentiality both employers and job seekers can elect to maintain their confidentiality.

CONCLUSION

The study was conducted to know the effectiveness of e-recruitment or online recruitment. Specifically, the study aimed to determine the extent of recruitment done through the electronic medium, to identify the services and operation of major job portals. This project can go for further research on the perception of candidates.

E recruitment is electronic e recruitment; it is very helpful to the many organizations. The aim of this study was limited to elements of e recruitment and recent trends of e recruitment and benefits of e recruitment. It has been said that recruitment is not only about hiring the best rather it's the question to enroll the right candidate in the organization. E recruitment it has many benefits for both job seekers and recruiter like cost saving benefits and time saving., quickness, but still it cannot be suitable for every job and profile. It is recent trend in recruitment process Many small and large scale of organizations are adopted to the e recruitment process. It is totally depending on the technology or network or internet.

APPENDIX

QUESTIONNAIRES

A study on E-Recruitment

1. Name:

2. Age: 20-25

- 25-30
- 30-35
- 35-40
- Above 40

3. Gender:

- Male
- Female

4. Qualification:

- Diploma
- UG
- PG
- Ph.D

5. Designation:

- Executive
- TL
- Manager
- Tele caller
- Admin

6. How the candidates are mostly sourced from?

- Job portals
- Employee referrals
- Social media
- All the above
- Any other Please sepcify

7. Rank the recruitment website according to the Naukri
Shine Magnes jobs Linkedin Monster

8. Do you agree that e-recruitment is the fastest mode is to apply for job?

Strongly Agree Agree NeutralDisagree Strongly disagree

9. Do you think that E-Recruitment is an effective way to gather quality resumes than the old traditional method of gathering?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

10. Do you agree that E-Recruitment supports in bringing better qualified candidates in an organization

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

11. Do you agree that large pool of candidates can be collected through e-recruitment?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

12. Do you agree that posting of jobs online is cost saving activity for the organization instead of advertising in the newspaper?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

13. Do you agree that E-Recruitment reduces the Recruitment and Selection cost?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

14. Do you agree that E-Recruitment saves time in collecting quantity of Resumes?

Strongly Agree

- Agree
- Neutral
- Disagree
- Strongly disagree

15. Do you agree that qualified candidate hired through E-Recruitment increases the performance of an organization?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

16. Do you agree that qualified candidate recruited through E-Recruitment leads to the reduction in employee turnover?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

17. Do you agree that applying through job portals and social networking sites is more accessible to the candidates?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

18. Do you agree that in the competitive market E-Recruitment helps in recruiting qualified candidate?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

19. Do you agree that E-Recruitment plays an important role in organization success?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree
-

20. Do you agree that corporate image is the reason for preferring E-Recruitment by the company

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly disagree

21. Which are the following measures is mostly used to evaluate the impact of E-recruitment?

- Number of successful applicants Cost per hire Time taken to close position Candidate satisfaction.
